EDUCATION

B.Tech — Computer Science Engineering Jul 2023 – Jul 2027

Vellore Institute of Technology, Chennai CGPA: 8.87

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, C++, C, SQL
Cloud & DevOps: Firebase, Vercel (CI/CD), Git, GitHub
Databases: MySQL (RDBMS), MongoDB(NoSQL),Redis
Core Concepts: DSA, OOP, SDLC, Agile, Secure Coding, System Design, CN, Operating System, Blockchain
Soft Skills: Problem Solving, Logical Reasoning, Team Collaboration, Ownership, Communication

PROJECTS

NyayAI — AI-Powered Legal Assistant : https://nyay-ai-beta.vercel.app

- Fine-tuned a legal-domain language model to automatically identify key entities in Indian legal documents such as parties, dates, monetary values, and obligations — making contracts readable at a glance.
- Built a clause risk classifier that analyses contract sections across common legal domains and flags potentially unfavourable terms, helping users make informed decisions.
- Implemented a retrieval-augmented generation pipeline that lets users ask plain-language questions about their documents and receive grounded, citation-backed answers.

DocHive — Doctor-Patient Management Platform : https://web-project-six-umber.vercel.app/

- Built a full-stack cloud-deployed React.js + Firebase application enabling real-time data exchange between doctors and patients via a RESTful service layer.
- Implemented secure role-based Firebase Authentication, ensuring data privacy and access control across different user types.
- Focused on clean component architecture, code quality, and a responsive intuitive UI.

EXPERIENCE

Management Team Member — DAO Community, VIT Chennai Jun 2024 – 2026

- Conducted technical workshops on Web3, blockchain, and smart contracts for 100+ students, strengthening communication and technical ownership skills.
